

## Small storage box – Ultimate Stations

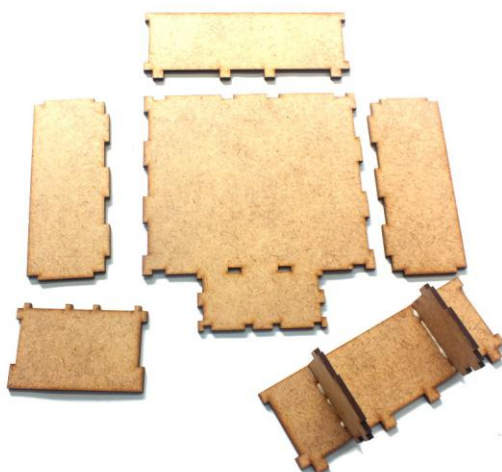

**READ General Instructions FIRST!**

**TIP:** Do a test run first, before gluing.

**Sheet: UDA-2 (Dropper) or UGA-2 (GW) or USA-2 (storage)**

**Other parts on the sheet are for the large low paint unit.**

1

1 the pieces to be glued.

First glue the two small pieces into the upright slits of the front wall. Ensure proper orientation. Small tabs to the top.

2

2 then glue this into the bottom plate. Don't leave any gaps!

3

3 glue on the side walls. Ensure right angles.

4

4 Glue on the back wall and the short front wall. At the bottom, several tabs will stick out. This is correct, they are guides to fit into the bottom plate of the system.
