

# Portable Brush Holder

**READ General Instructions FIRST!**

**TIP:** Most pieces fit together without glue. Do a test run first, before gluing.

**Sheets:**

**Small sheet with brush holder**

**No number**

1

1 the pieces to be glued.  
The engraving on the large pieces both have to face up and toward the table, so away from you.

**Both pieces with square holes onto the same plate**

**2** first glue in the 4 brush holder pieces. Open side on top, closed ones on the bottom.

**Both pieces with square holes onto the same plate** (for the triangular brushes). **Carefully insert them, they can break easily, if you apply pressure at the top.**

Apply pressure at the bottom only.

**3** Now glue together two of the T-shaped pieces very fittingly. Do this twice. Don't let glue show anywhere.

4

4 Insert the „saber tooth“ on top and the ring at the bottom **in between** the brush holders **WITHOUT** glue.

Then glue the T-pieces into the hinges.

**Only put glue into the square holes, so that everything can move freely and can be folded.**

**Put glue ONLY** into the square holes, best to do this from the outside. „Saber tooth“ has different sides for triangle brushes (4 cutouts), orientate properly!

5

Tip: Use rubber band to close it. Put protective caps on the brushes. Hold “saber tooth” on the side while opening the case so the brushes stay in place.

5 Glue the side walls into the slits /cutouts along the outside, and also glue them to the brush holder pieces.

**The pieces with little cutouts in the middle with the upper / open brush holders.**

Ensure right angles.

**Test that everything can fold and open easily before the glue is dry.**
