

storage box – Small GW / Dropper Stations

READ General Instructions FIRST!

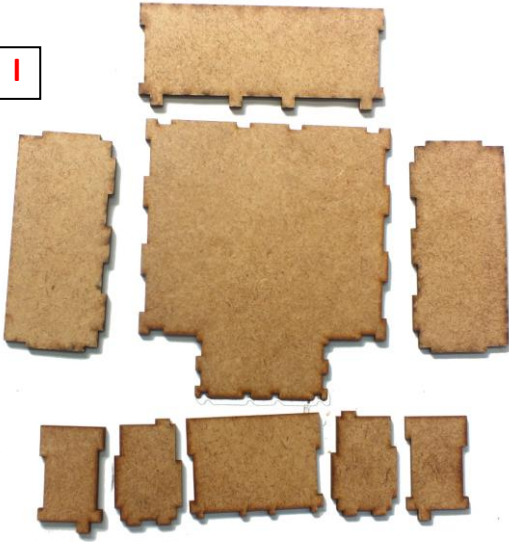

TIP: Most pieces fit together without glue. Do a test run first, before gluing.

Sheets:

Dropper: SD-04, SD-05

GW: SG-04, SG-05, SG-06

1

1 the pieces to be glued.

2

2 glue the two short sidewalls and two front sidewalls into the bottom plate. Don't leave any gaps! Ensure right angles.

3

3 glue the short front wall, the long side walls and long back wall into the bottom plate. Ensure proper orientation. Ensure right angles.

At the bottom, several tabs will stick out. This is correct, they are guides to fit into the bottom plate of the system.

Miniature holders

glue the upright piece into the slit of the other one. Glue two disks all the way into this. Glue the disk with small cross on top. Also works without glue, but not as well.

Attach miniature with e.g. blue tack. Glue on cork disk if you want to pin minis.

Into this box, put the water pots, water pot holders, connection plates and wet palette (upright). Store the power cable of the lamp into the water pots. Water pots do not fit in Small GW Station.
