

Home Expansion – Corner GW paint holder

Regular and stackable versions

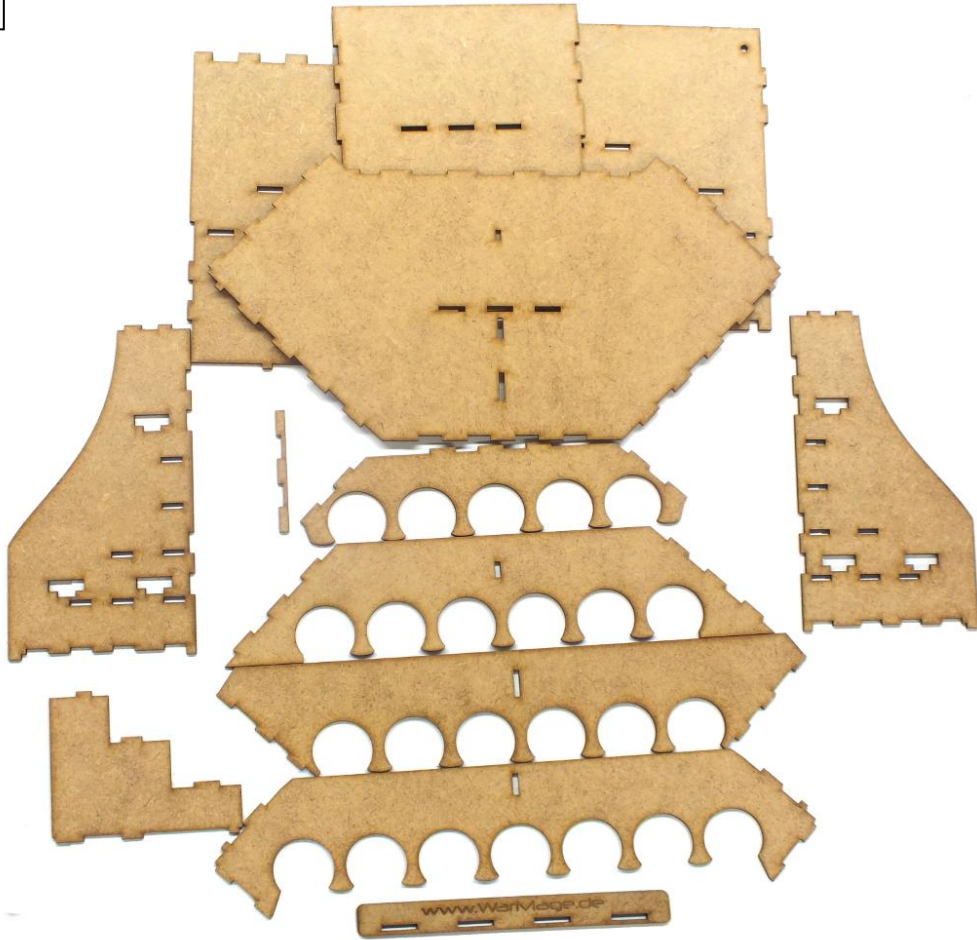

READ General Instructions FIRST!

TIP: Most pieces fit together without glue. Do a test run first, before gluing.

Sheets:

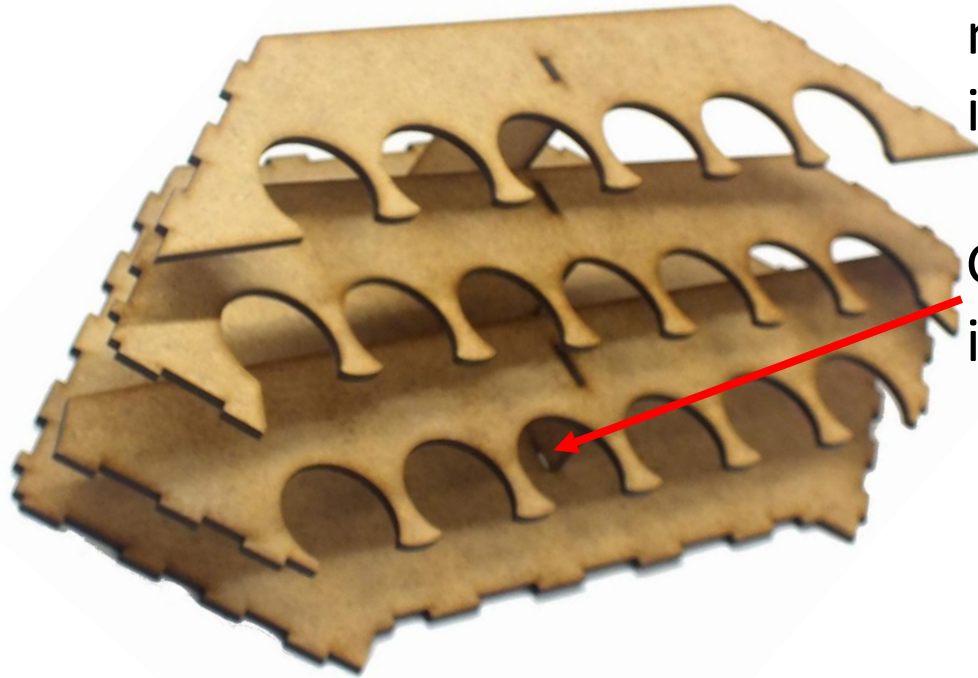

Regular: HCG-1 to -4

Stackable: HCGS-1 to -5

1 regular version:
the pieces to be glued.

Stackable version:
Sidewalls look different,
and additional top plate.

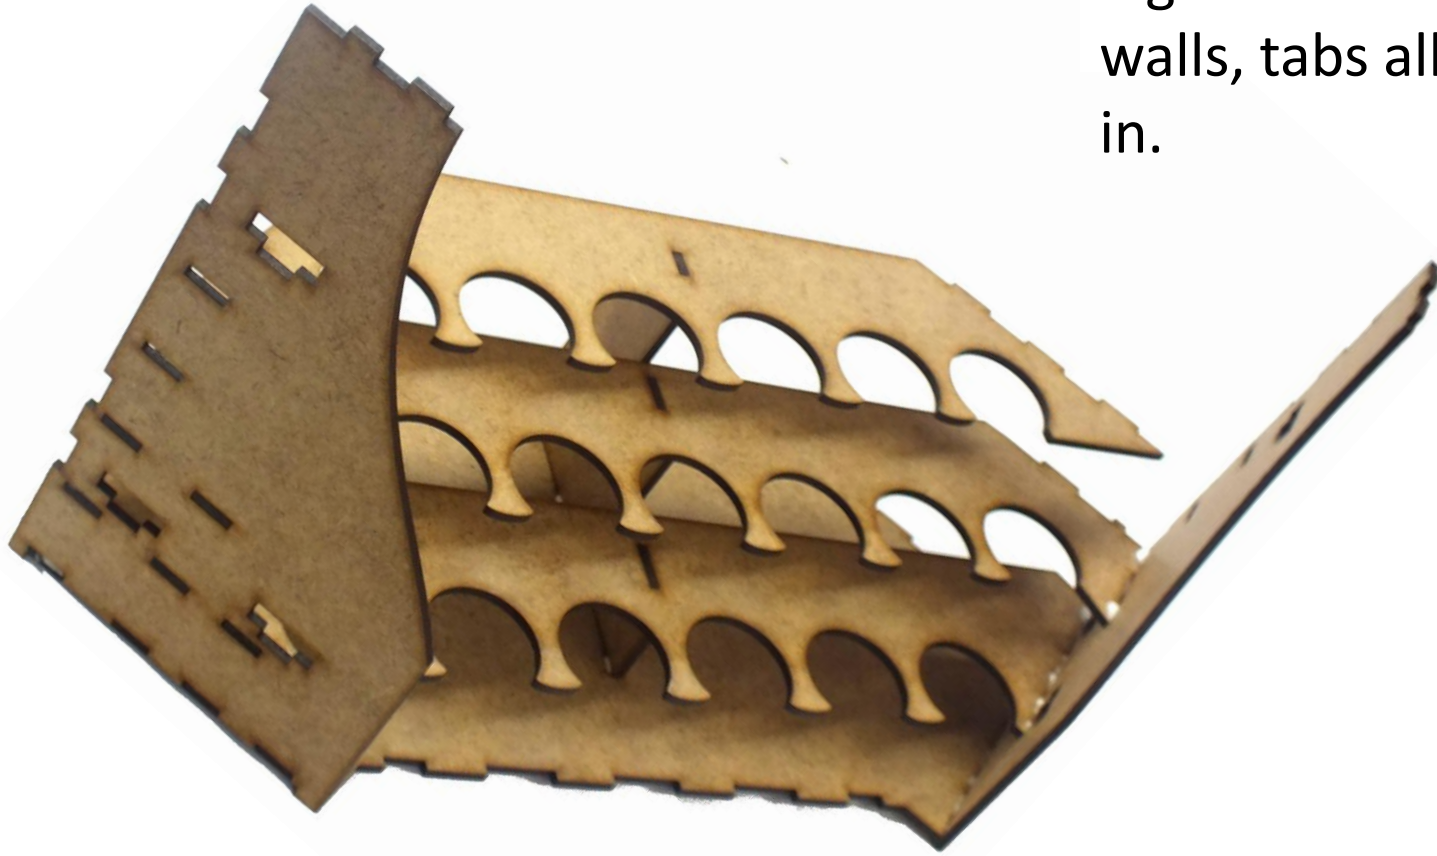

2 first glue in the 3 paint holders into the tabs of middle strut (they only fit in the right slits).

Glue the middle strut into the base plate.

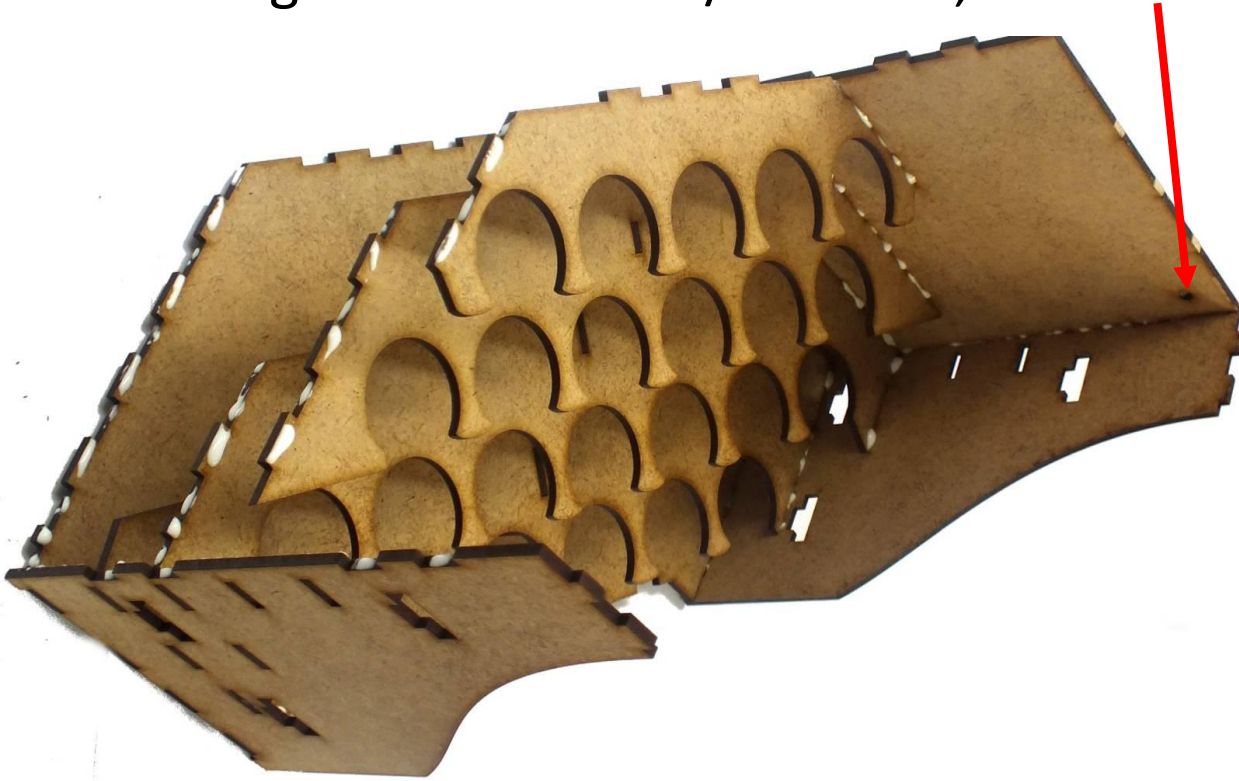

3 glue on the 2 side walls, tabs all the way in.

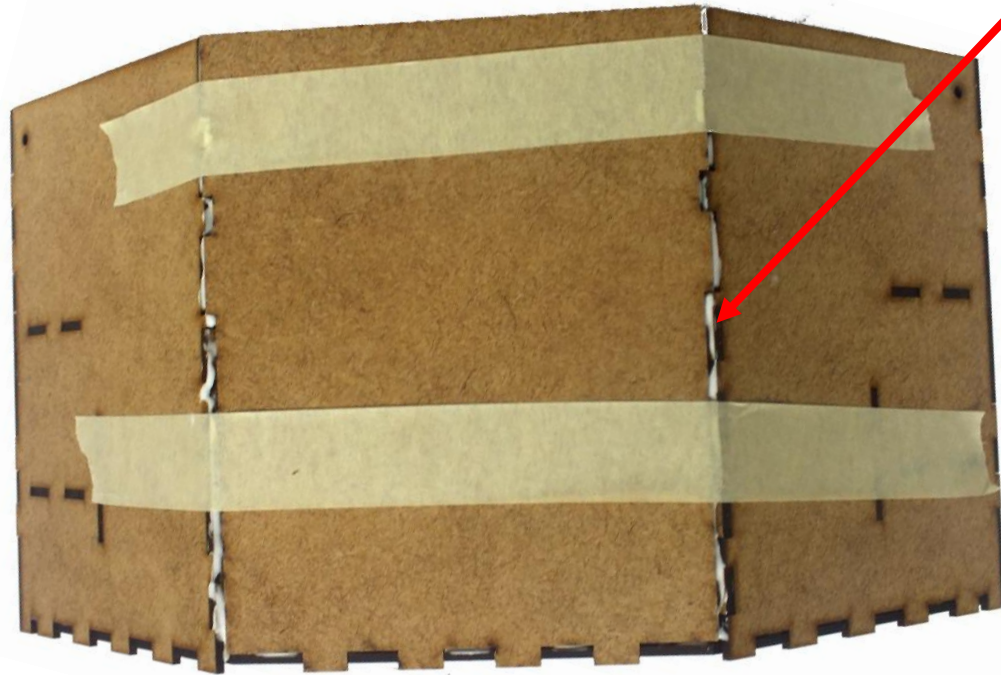

4

4 then glue in one back / sidewall, round hole facing up.

5

5 Glue on the other side / back wall and then the large back wall with plenty of glue between the angled pieces to ensure they hold properly and the gaps are closed.

The tabs stick out at the bottom. This is correct.

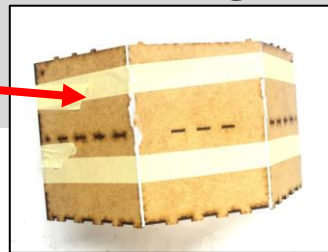

6

6 Glue the front support strip (4 slits) onto the front of the base plate. Also glue the little piece with 3 tabs into the slits of the bottom plate from below. Ensure that the whole module is straight.

**Stackable Version:
Glue on the top plate also (with 2
round holes)**

Tip: During glue drying time use masking tape to ensure proper angles / fit of the large back plates.
